SUBJECT INDEX TO VOLUME 43

Aluminum, speciation in systems containing nucleoside diphosphates, fluoride, and, 37
Aminoalkanol platinum(II) complexes, antitumor activity of, 57
Antitumor activity
  aminoalkanol platinum(II) complexes and, 57
  octahedral antitumor complex *trans*-$RuCl_2(DMSO)_4$ and 2′deoxyguanosine, 739
Arenicola marina deoxyerythrocruorin, pH-induced transitions in nitric oxide complex of, 9
Azopyrazolone derivatives, transition metal chelates and, 1
B to Z transitions, mercuric perchlorate and, 29
Bacterioferritin core, *Pseudomonas aeruginosa* and, 753
Benzimidazole-containing ligands, dicopper complexes of, 723
Bilirubin mitochondrial membrane stability and, 759
  phospholipase A_2 and, 759
Cadmium, neural isoorotic and 2-thioisoorotic acids and, 17
Calcium
  $Ca(c_5H_3N_4O_3)_2 \cdot {}_6H_2O$ with $L = (CH_3)_2SO$ or $(CH_3)_2NCHO$, calcium hydrogenurate complexes of the type, 771
  calcium hydrogenurate complexes, 771
  oxygen donor molecules and calcium hydrogenurate, 771
Catechoyl-dipeptides, copper(II)ion coordination to, 779
Circular dichroism studies, 29
Cisplatin, aminoalkanol platinum(II) complexes vs., 57
Copper
  Copper(II) ion coordination, 779
  $Cu_2(EDTB)(C1)_4)_2$, absorption maximum for, 723
  prostaglandin E_2 action and amplification of, 65
CTP synthetase, platinum compounds and, 717
Cyclic AMP, copper and prostaglandin E_2-induced efflux of, 65
Dicopper complexes of benzimidazole-containing ligands, 723
Ehrlich ascites tumor cells, platinum compounds and CTP synthetase with, 717
EPR
  nitrous oxide erythrocruorin and, 9
  vanadyl and vanadate ion retention and, 731
Erythrocruorin, nitric oxide complex of, 9
Europium
  Eu-ATP and Gd-ATP, stability constants of, 45
  Eu(III), iminodiacetic acid (IDA) and, 45
Fluoride, speciation in systems containing aluminum, nucleoside diphosphates, and, 37
G-protein systems, Al^{3+} and F^- in, 37
Gadolinium
  Gd-ATP, stability constants of Eu-ATP and, 45
Hansenula polymorpha, vanadyl and vanadate ion retention by, 731
Hepatic membranolytic stability, metalloporphins and alteration of, 759
Iminodiacetic acid (IDA), Eu(III) and, 45
Iron, *Pseudomonas aeruginosa* and, 735
Isoorotic, 2-thioisoorotic acids, complexes of, 17
Leucine aminopeptidase and ribonucleotide reductase, copper(II) ion coordination to catechoyl-dipeptides, 779
Mercuric perchlorate, B to Z transitions and, 29
Mercury
  Hg(II) binding, poly[d(T-G)·d(C-A)] chirality and, 29
  neural isoorotic and 2-thioisoorotic acids and, 17
  Watson-Crick hydrogen bonding and, 29
Metal chelates, azopyrazolone derivatives and transition, 1
Metal ions
  catechoyl-dipeptide coordination of, 779
  xanthine and binding of, 51
Metal urate salts, 771
Metal-nucleotide complexes, stability constants of, 45
Metalloporphins, hepatic membranolytic stability alteration by, 759
Mitochondrial membrane stability, bilirubin and, 759
Mössbauer spectroscopic studies, iron in *Pseudomonas aeruginosa* and, 753
Nickel
  Ni(III) and Cu(II) chelates, azopyrazolone derivatives and, 1
Nucleoside diphosphates, speciation in systems containing aluminum, fluoride, and, 37
Octahedral antitumor complex *trans*-$RuCl_2(DMSO)_4$, 2′deoxyguanosine and, 739
Oxygen donor molecules, calcium hydrogenurate and, 771
Palladium, neural isoorotic and 2-thioisoorotic acids and, 17

Phospholipase A_2, bilirubin and, 759
Platinum
antitumor activity of platinum(II) complexes, 57
CTP synthetase and compounds of, 717
neural isoorotic and 2-thioisoorotic acids and, 17
Poly[d(T-G)·d(C-A)] chirality, Hg(II) binding and, 29
Prostaglandin E_2 action, copper amplification of, 65
Prostaglandin E_2-induced efflux of cyclic AMP, copper and, 65
Pseudomonas aeruginosa, iron in, 753
Ribonucleotide reductase, copper(II) ion coordination to catechoyl-dipeptides, 779
Stability constants of metal-nucleotide complexes, 45
Thermotolerant yeast, vanadyl and vanadate ion retention by, 731
Trans-$RuCl_2(DMSO)_4$, 2′deoxyguanosine and octahedral antitumor complex, 739
Transition metal chelates, azopyrazolone derivatives and, 1
Transition-metal ion coordination to xanthine, 51
Tumor cells, platinum compounds and CTP synthetase of Ehrlich ascites, 717
2′Deoxyguanosine, octahedral antitumor complex *trans*-$RuCl_2(DMSO)_4$ and, 739
2-(5-bromo-2-pyridylazo)-5-(N-propyl-N-sulfopropylamino)phenol, Eu-ATP and Gd-ATP stability constants with, 45
2-thioisoorotic acids, complexes of isoorotic and, 17
Vanadate ion retention, EPR study on vanadyl and, 731
Vanadyl and vanadate ion retention, EPR study of, 731
Watson-Crick hydrogen bonding, mercury and, 29
Xanthine, transition-metal ion coordination to, 51
